

Improvements in APPEL and the offline eSingleForm 3.9

- (1) The **Annex B** (checklist upon final reporting) has been added to the Final Report. This chapter remains 'draft' after uploading the FR from the offline, to remind the partners to at least annex the Financial overview and the Payment request before submission.
- (2) In **chapter 11**, Financial Overview, the amounts in numbers are added to the message "Direct eligible costs = Sum of amount per result + Other costs". This in order to make it more clear where the subtotal of Direct eligible costs comes from.
- (3) **Mandatory fields and chapters** have been adjusted for all eDocuments depending on the type of decision. **Validation** rules have been adjusted accordingly.
- (4) **Increased the speed** for the **creation** of an eRequest in APPEL.
- (5) **Increased the speed** for the **submission** of an eRequest in APPEL.
- (6) **Display all draft eRequests by default** when opening the eRequest search screen in APPEL for the first time.
- (7) Corrected and improved some text labels.
- (8) **Corrected the Offline eSingleForm global validation** error that sometimes occurred in version 3.8.
- (9) **PDF created offline** sometimes did not work due to special characters (e.g. < >) has been corrected.
- (10) **Track changes** function, to compare 2 eDocuments has been corrected (see known issues for more information) This feature will be continuously improved, release independent
